

Smarter produce forecasts, more of your shelves covered.

Our new AI-driven demand engine is now forecasting your produce items more accurately than ever — and it's looking at far more of your assortment than the previous system ever did. Here's what that means for Rays.

What's improving for Rays

85.3%

of items are forecast more accurately than they were under the legacy method — meaning closer-to-real demand, less guesswork at the store level.

+1,463

additional item × store combinations now have a daily forecast — including **937** unit-sold items that the previous system never forecasted at all.

98.1%

of daily forecasts land within 2 cases of actual sales — the practical accuracy threshold for produce ordering.

+267%

growth in unique produce items covered vs the legacy system (194 → 712).

What we're doing next

1

More items, every day

Continued expansion to cover every produce item in your assortment — including slow movers and seasonal SKUs.

2

Sharper short-horizon

Tighter accuracy on the next 1–7 days, where ordering decisions actually happen.

3

Promo and event awareness

Better handling of ads, holidays, and weather so your forecasts adjust before sales spike.

4

Store-level tuning

Per-store models that pick up the unique buying patterns at each location.
